Plentiful wildlife in Etosha National Park

Note:

The species mentioned in the report are only some of the species seen at each locality. Please refer to detailed checklists at end of the report for all species seen on this specific tour.

This all-encompassing Namibia and Botswana tour produced an excellent total of 350 bird species, considering it was mid-winter with a distinct absence of intra-African and Palearctic migratory species. For me Namibia is a special place – a vast country, with spectacular scenery brimming with endemic birds. Add to this the world-famous Okavango Delta and you are surely going to get some rare and unusual birds.

“Namibia is a land of stunning contrasts, famous for its stark beauty, extraordinary landscapes, its kaleidoscope of colours, the diversity of its tribes and cultures and its multiplicity of wildlife, and boasting some of the most spectacular desert ecosystems in the world; it is veritably a geologist’s and naturalist’s paradise. Essentially a desert land, Namibia is surely one of Africa’s most interesting and unusual countries.”

Southern Giraffe – Etosha

Birding by mokoro in the Okavango Delta

And many rarities and specials we had indeed: Orange River Francolin, Hartlaub’s Francolin, Burchell’s Courser, Violet Woodhoopoe, Damara Hornbill, Benguela Long-billed Lark, Gray’s Lark, Dune Lark, Carp’s Tit, Herero Chat, Rockrunner, SOUZA’S SHRIKE, White-tailed Shrike, LESSER BLACK-BACKED GULL, Lesser Jacana, Greater Painted-Snipe, White-browed Coucal, Pel’s Fishing-Owl, RACKET-TAILED ROLLER and RUFOUS-BELLIED TIT were some of the star birds seen.

In search of endemics in the Erongo Mountains

Windhoek and Surrounds

Namibia's capital city, Windhoek, is nestled in the spectacular Khomas Hochland Mountains. Here we kicked off the trip with visits to several spots around the pretty city including the local sewage works!

Walvis Bay and Swakopmund

Here we explored red sand dunes, extensive mudflats, artificial salt pans, gravel plains and a rugged marine coastline. The coastal strip south of Swakopmund to Walvis Bay (a distance of some 30 km) has the highest density of shorebirds in southern Africa and perhaps on the whole continent. In excess of 13,000 birds of more than 30 species feed on the nutrient-rich beaches.

Erongo, Spitzkoppe and Brandberg Mountains

The Namib escarpment incorporates such granitic massifs such as Brandberg, Spitzkoppe and Erongo Mountains which boasts the majority of the country's near-endemic birds.

The mighty Brandberg – Namibia's highest mountain

Carp's Tit – Erongo Mountains

Erongo, Spizkoppe and Brandberg Mountains

The massive whale-back granitic domes of the Erongo Mountains must be one of Namibia's most spectacular settings. The Brandberg is Namibia's highest mountain which towers over endless plains scattered with Milkbushes (*Euphorbia damarana*) and other interesting desert life.

The dramatic Erongo Mountains

Caprivi Strip – Katere region, Bwabata and Mahango National Parks

This distinct finger of land has a quirky history. Blanketed in broad-leaved Teak woodlands this area harbours many special bird species, and is very different to the rest of the country.

Okavango Panhandle

From the Caprivi strip, the Okavango River flows into Botswana forming the upper reaches of the Okavango Delta. This area boasts a spectacular array of avifauna due to its varied habitats of forested islands, lush waterways, tranquil lagoons and dense papyrus swamps.

Birding in the Okavango panhandle.

The stunning African Skimmer – Okavango

Waterberg Plateau Park

This was a peaceful end to a very enjoyable trip. The dramatic mountain is a plateau of compacted Etjo Sandstone, complete with cliffs, rocky slopes and acacia woodland.
